

handiPOS

Professional

Improve your customer's shopping experience using **handiPOS Professional**

Using the CASIO DT-X7 terminal you can carry your EPOS system in your pocket to your customer. Using **handiPOS**, you can complete a sale without having to ask your customers to go and queue at a fixed checkout. Instead, after a customer has decided which product(s) they wish to purchase, you can scan the items and scan a barcode on a nearby networked or mobile printer. The system will direct the customer's receipt to the specified printer and then complete the sale using the associated Chip and PIN payment terminal.

The benefits of using handiPOS professional are: -

- Higher level of customer a service
- Fewer fixed checkouts required
- Reduced implementation costs as one printer and Chip and PIN terminal can support many **handiPOS** terminals
- Less weight for staff to carry
- The terminal can be used for other stock and label management processes when not required for point of sale
- Easy interfacing to ODBC compliant database systems
- Full EPOS functionality

The main features of this terminal are: -

- Light weight, approximately 145 grams with standard battery
- Colour keys to assist navigation through
- 802.11b/g WLAN, which is PCI compliant, and Bluetooth radio
- Up to 17 hours operation using the high capacity battery
- Vibrator to assist the operator in noisy environments
- Bright colour screen for use in a wide variety of light conditions
- Operating temperature range of -10°C to $+50^{\circ}\text{C}$
- Drop durability of 1.0 metre to concrete
- Can support voice over IP
- For security reasons, at the end of each sale the transaction data is stored on the network.

To minimise operator fatigue, the terminal has been designed to the ISO13407 standard for human interface. Users have found that thumb fatigue is significantly reduced.
